Sample Academic Paper

Author: John Doe

Date: 2024

Abstract

This is a sample academic paper for testing the PDF translation software. The software should be able to extract text, images, tables, and other elements from PDF files and translate them from English to Chinese while preserving the original layout and formatting.

1. Introduction

This is the introduction section. It contains multiple paragraphs that should be properly recognized and translated.

The second paragraph starts here. The software should be able to detect paragraph boundaries based on vertical spacing.

2. Main Features

1. Extract text with font information
2. Recognize and merge paragraphs
3. Extract and translate tables
4. Preserve images and drawings
5. Generate translated PDF with similar layout

3. Sample Table

Feature	Status
PDF Parsing	Complete
